# OUR HISTORY

## A CENTURY WITHOUT COMPROMISE

The Franke story began as a small sheet-metal business in Rorschach Switzerland, established by Hermann Franke in 1911. Since then, we've established efficient and economic manufacturing facilities all around the world.

## HUMBLE BEGINNINGS

Founded in 1911, Franke was built on a foundation of precision engineering, combined with traditional craftsmanship. Over 100 years later, those principles endure, while a focus on the changing needs and lifestyles of our customers has helped us become the world's largest manufacturer of kitchen sinks.

## SWISS PRECISION

Many things have changed in the past century, but what is always the same is our set of values, characterised by respect, trust and openness. The values of innovation, entrepreneurship, quality and stylish design were in the heart of Hermann Franke. This continues as we enter a second century of smart design and stunning beauty.

## INSTALLATION TYPES

### INSET SINKS (IN)

Inset sinks are installed from above into a pre-prepared hole in your worktop. It gives you the widest range of sink shapes, sizes and styles to choose from.

### UNDERMOUNT SINKS (UM)

Undermount sinks are installed underneath the work surface and require a solid surface such as granite. They are not compatible with laminate work surfaces.

### FLUSHMOUNT SINKS (FM)

Flushmount sinks feature a single thickness edge allowing a slimfit to the benchtop which can also be recessed resulting in a flush fit with the surface.

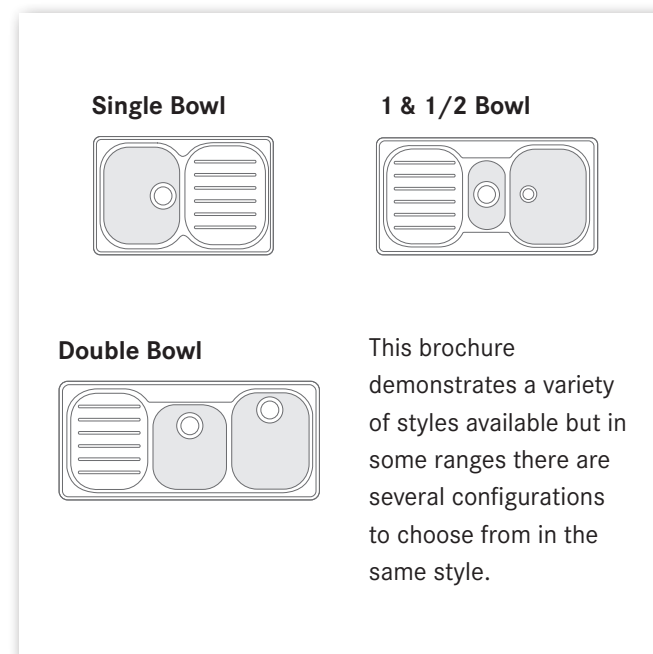

## CHOOSING YOUR PERFECT SINK

As the kitchen sink is seen as the heart of the kitchen, it's the perfect starting point for creating your dream kitchen. There are however certain functional considerations to take into account and the following information will help to ensure that your ideal sink is the perfect fit for your ideal kitchen.

### BOWL & DRAINER CONFIGURATION

The type and position of your bowl depends on how you intend to use your sink. If you like room to clean large items like grill pans, a larger single bowl may be best for you, or for a multi-functional purpose, you may prefer the versatility of two separate working bowls.

The drainer location is also an important consideration. For many sinks you will need to choose the specific version you prefer - with drainer on the left or right hand side. Whereas other sinks are reversible which indicates the drainer can be positioned on either side.

## MATERIAL TYPES

### STAINLESS STEEL

Franke stainless steel sinks are made from premium quality chrome nickel steel, which looks stunningly beautiful, is highly resistant to staining, rust and corrosion - plus it won't chip, flake or break.

It's the most popular material - and for good reason: Stainless steel has a timeless quality that sits beautifully in a traditional or contemporary style kitchen, offering stunning good looks and a durability that helps keep it looking at its best for years.

### FRAGRANITE

Fragranite is an exceptionally tough material containing 80% quartz and 20% resin to form a unique material with a subtle sheen that is warm to the touch.

Kitchens can be a critical location for spreading bacteria. On unprotected material, bacteria can multiply every 20 minutes making surfaces unhygienic. The integrated Sanitized® hygiene function in Fragranite sinks helps to keep this area clean and provides the sink with lasting protection.
