

**■ GEBERIT**

# HIDDEN SECRETS OF BEAUTIFUL BATHROOMS.

**GEBERIT CONCEALED  
TECHNOLOGY**

The iconic Eiger hotel in Switzerland where Geberit's concealed cisterns were installed in 1964 and were replaced 50 years later when the bathrooms were renovated.

# Designed in Switzerland. At home in New Zealand.

## Swiss Precision

European design and precision Swiss engineering has been at the heart of Geberit's commitment to product innovation since 1874.

To ensure the highest product quality, Geberit manufactures its cisterns in Germany and its flush plates in Switzerland.

Geberit has aligned its vision to create a sustainable environment and improve people's wellbeing with its actions of sustainable sourcing, manufacturing, logistics and product design.

## Functionality

Functionality and stylish contemporary design come together when a Geberit concealed cistern is installed behind the wall, allowing freedom of design at the front of the wall.

This philosophy has led to more than 60 million Geberit concealed cisterns installed worldwide – and users experiencing the luxury of well-designed lifestyle bathrooms.

## Design Freedom

Working in partnership with leading designers, Geberit's range of stylish button designs and finishes ensure there is a high quality design option for all contemporary bathroom styles.

## Reliability

Up to 15 years warranty on cisterns and spare parts availability of 25 years. Complete peace of mind behind the wall, for the life of the bathroom.

## TRIBECRAFT Zürich

Award winning designer, Daniel Irányi and his team at Tribecraft have been collaborating with Geberit since 2000.

With a focus on design and function, Daniel's aim is to create minimalist buttons that complement the features of the bathroom.

Daniel studied industrial design at the Art Center College of Design Europe, Switzerland and is responsible for designing the award winning Sigma80.

Daniel's innovative designs have won the IF Product Design Award (2012) and the Red Dot Design Award (2012).

# Runs like clockwork

Swiss clockwork, to be precise

'Modest perfection' are the words used by Christoph Behling to describe the range of Sigma50, Sigma01 and Omega60 buttons designed by his team.

"Geberit products don't scream, 'Look at me, I'm different' and for that reason we have designed these buttons with love and patience to produce a high quality product that cannot be found in mass-produced items."

Christoph and his team work with a number of global brands, including Tag Heuer, to create fresh and inspiring products.

# Sigma

## For inwall installations

The Sigma range of buttons offer design freedom at the front of the wall with an extensive range of button finishes.

Suitable for traditional inwall installations the range suits New Zealand construction practices making installation intuitive.

The concealed cistern provides a choice of design options including a wall hung toilet which allows for uninterrupted wall and floor tiling, giving the appearance of space.

All Sigma buttons are compatible with Sigma8 concealed cisterns.

All Geberit concealed cisterns carry a warranty of up to 15 years and spare parts availability of 25 years.

“Our goal in designing **Sigma80** was to bring a stylish and minimal glass interface to life as you approach it”

Daniel Iranyi,  
Award-winning  
designer

# Sigma80.

The remarkable, touchless Sigma80 electronic button that operates with the wave of your hand.

The high quality glass finishes in the Sigma80 range showcase a modern style with an innovative touchless flush activation.

The wave of a hand over the button LED lights provides a subtle display that reflect the sequence of a full or half flush.

The LED lights can be programmed for an ambient light setting – lighting the way to the bathroom at night. Activated by a sensor movement, the button allows an 'always on' or 'always off' mode and an auto flush setting, making the Sigma80 an ideal addition to a touchless bathroom.

All Sigma buttons are compatible with Sigma cisterns.

## Our lightest touch flush activation.

Designed to give the appearance of a button that floats on the wall, the Sigma70 is as functional as it is stylish.

Sitting only millimetres from the wall, the technology behind the Sigma70 activates the flush effortlessly, via an innovative pivot mechanism.

With the highest quality materials and craftsmanship, the buttons are designed to complement the bathroom.

# Omega

For under counter or  
low height installations

Ideal for smaller bathroom spaces, Omega concealed cisterns provide flexible installation options for under counter or low height installations.

If space is at a premium it can be maximised by installing the cistern in a hob, under a window or in the vanity.

The button can be located for top or front press, providing versatility.

Compatible with the Omega cisterns.

# Omega60.

Sits flush with the wall.

The button features a stylish surface—even finish that sits flush to the wall offering a seamless look for a contemporary bathroom. Installation and design flexibility are key features.

The compact button can be installed above or in front of the cistern for greater design flexibility.
