

**A new
bathroom
experience**

Roca

Roca, leading the way

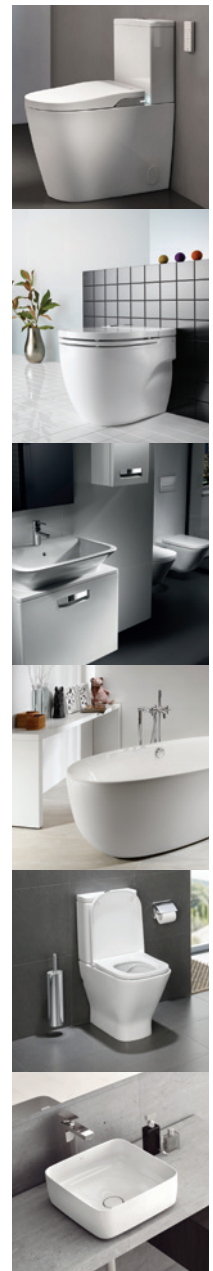

Inspired by design and driven by the passion of its Spanish heritage, Roca has been shaping bathroom design for over 100 years. A world leader operating in over 135 markets, Roca is always at the forefront of bathroom trends. Working with some of the world's most prestigious designers, Roca crafts distinctive and original designs that enhance the way people live.

In the zone

Across the globe, the role of the bathroom continues to be elevated within the home. While cultural differences exist from country to country, there is common recognition of the increasing importance of the bathroom to our daily lives. The bathroom is now considered an uninhibited wellness zone. And through clever design, Roca creates bathroom products that nurture health, improve comfort and enhance quality of life.

We care

Roca has a longstanding commitment to the environment and sustainability. For decades Roca has been developing products that reduce water and energy usage without sacrificing comfort. Roca believes that sustainability is at the very heart of good design – that's why Roca created a foundation that encourages better water usage – The We Are Water Foundation. The We Are Water Foundation is a non-profit organisation that works to enhance awareness and sway public and institutional opinion about the need for the sustainable management of the world's water resources. They also undertake a variety of activities to mitigate the adverse effects of inadequate water resources.

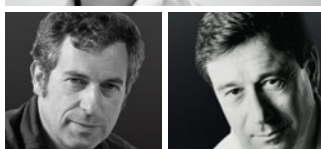

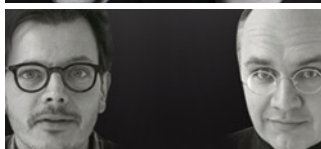

REECE PRODUCT QUALITY GUARANTEE

Roca tapware, bidettes, toilets and basins enjoy a 7 year product warranty. Roca baths enjoy a 10 year product warranty. Electrical components enjoy a 2 year warranty. For full warranty details visit reece.com.nz/warranties

Design and innovation

Roca Partners

Roca partners with some of the world's most prestigious architects and designers to develop products and ranges that allow consumers to create bathrooms that reflect their individual needs and expression.

These creative collaborations have earned Roca many international awards for design and usability and are an important part of Roca's commitment to innovative bathroom design.

Roca Design Centre and Innovation Lab

Recognising the importance of innovation, Roca established the Roca Design Centre – a unique facility that focuses on research into design trends based on living styles of different people around the world. Within the Design Centre is the 'Roca Innovation Lab' where designers are free to explore new ideas, materials and looks.

Roca's commitment to design has been recognised on numerous occasions. Most notably as a recipient of the 2009 Red Dot Design Award, the 2009 Design Plus Award, 2010 Wallpaper Design Award and the Designer Awards 2012 – some of the world's most distinguished design awards.

Roca Galleries

To celebrate and showcase its passion for design and innovation, Roca created the Roca Barcelona Gallery – an avant-garde space offering a unique interactive and visual experience that reflects the relationship of the individual and the bathroom. Similarly spectacular galleries have also been established in Lisbon, Shanghai, Madrid, London and Beijing.

World Leading Technology

Welcome, Smart Toilet

Roca's new In-Wash® Inspira is the perfect solution for your daily hygiene. Uncomplicated and straightforward. Its remote control is absolutely intuitive and anyone can easily customise its settings through simple interfaces.

Slim design

Main function:
Cleaning and drying

Easy adjustment of:
Temperature
Pressure
Nozzle position

An all-in-one solution

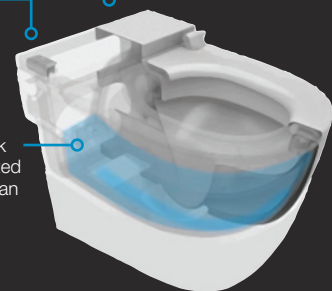

In a world first, the Meridian In-Tank integrates the cistern and buttons into the pan itself, eliminating bulk and ensuring a pure minimal aesthetic.

The buttons are seamlessly built into the pan

Soft Air® Technology, integrated air pump

9 litre tank is integrated into the pan

A cleaner, more sophisticated flush

The Gap Rimless circulates water around the inner perimeter of the pan from one flushing point, achieving better performance while offering easier cleaning and better hygiene.

One single flushing point distributes water evenly to the entire perimeter of the pan

Simplicity in its finest form

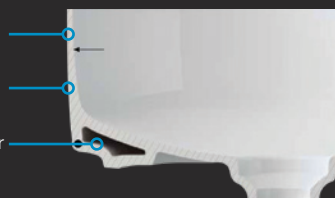

A new generation of ceramic material, FINECERAMIC®, achieves more precision than ever before to create the ultimate in thin-edged design.

Small radius

Thin walls

Stronger and lighter

Smart choice For everyone

Welcome, Smart Toilet

In-Wash® Inspira is the perfect solution for your daily hygiene. Uncomplicated and straight forward. Its remote control is absolutely intuitive and anyone can easily customise its settings through the simple interface.

Pan, cistern and buttons all-in-one

Offering a sleek silhouette with buttons and cistern incorporated into the pan itself, the world-first Meridian In-Tank revolutionises the humble toilet. Modern, minimal and classic, the slimline suite is a stylish addition to any bathroom.

Flexibility and freedom

The Meridian In-Tank offers the freedom to create, without the need for a concealed cistern. The all-in-one solution means that the toilet can be installed in a greater variety of spaces with ease.

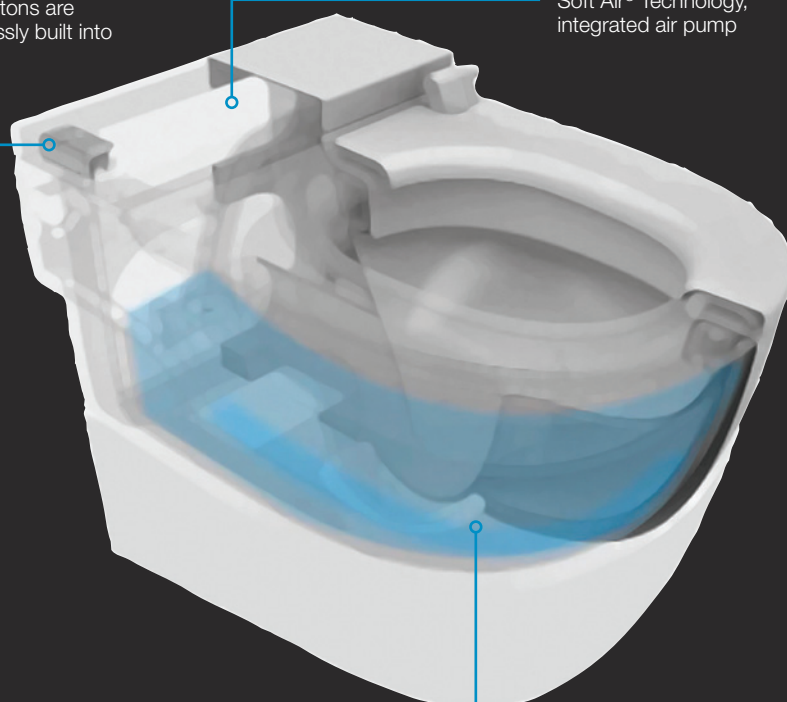

Fluidmaster Soft Air® Technology

Developed in conjunction with Fluidmaster for Roca, Soft Air® Technology is a special process, which comprises an air injection system in the cistern to optimise water flow. This clever feature ensures an effective flush while still being water efficient.

The buttons are seamlessly built into the pan

Meridian IN-TANK Wall Hung Pan

Meridian IN-TANK Back to Wall Pan

One single flushing point distributes water evenly to the entire perimeter of the pan

The height of hygiene

Incorporating an advanced rimless design, The Gap Rimless allows water to circulate along the entire perimeter of the pan. This technology enables a higher level of hygiene as well as the advantage of easier cleaning.

Rimless Technology

With The Gap Rimless, Roca presents an entirely new approach to toilet suite design. The Gap Rimless delivers superior hygiene and cleaning performance matched with beautifully stunning lines. The Gap Rimless is also highly compact, making it ideal for smaller bathrooms.

Higher Efficiency

Conventional toilet designs distribute the water through holes in the rim, so that water falls straight down towards the outlet, which can miss residue. Due to its rimless design, The Gap Rimless sends water around the upper part of the bowl's perimeter, moving in a circular motion towards the outlet, resulting in a cleaner and more hygienic surface.

The Gap Rimless
Close Coupled Back
to Wall Toilet Suite

A finer finish

From a wealth of experience in the field of sanitaryware comes Roca's latest innovation: FINECERAMIC®.

The new generation of high-quality ceramic is a lighter, stronger, more sophisticated material that offers greater versatility in design.

Slimline design

FINECERAMIC® is 30 per cent lighter than other traditional ceramic materials, giving it a desirable slimline finish with fine, elegant edges. Greater precision is achievable in the design details with the ability to create shapes that were not previously possible.

Sophistication for you, sustainability for the environment

Lighter materials means Roca can continue to support their commitment to the environment through reduced energy consumption in production and transportation. The ceramic is also completely recyclable.

Round

Stunning, feminine and friendly. Its elegant and gentle shape will surprise how natural geometry can be.

Soft

Balanced, attractive and comfortable. Its charming shape will ensure a highlight in any ambience.

Square

Minimal, masculine and precise. Its sleek shape will adapt to architecture with a subtle human touch.

Inspira Round
Vessel Basin

In-Wash® Inspira Smart Toilet

In-Wash® Inspira is the perfect solution for your daily hygiene. Uncomplicated and straightforward. Its remote control is absolutely intuitive and anyone can easily customise its settings through its simple interface.

For everyone

Its soft curves, its minimalist design and its intuitive technology make it a toilet that fits any lifestyle. At Roca, we believe that technology should not be exclusive, but accessible to all and totally versatile to suit everyone's needs.

By the smartest

In-Wash® Inspira has been developed by Roca's designers and engineers, experts in bathroom solutions, that have incorporated the most advanced technology to respond to the needs of the most demanding consumers.

Meridian IN-TANK

With its stunning lines, the new generation Meridian In-Tank is set to revolutionise the bathroom with innovative technology. For the first time, the cistern has been integrated into the pan itself and doesn't require installation of a cistern and flush plate into the wall – simple installation and pure minimalism.

Accessories not available in New Zealand.

Smart Features

The Meridian In-Tank offers the freedom to create, without the need for a concealed cistern. The built-in light in the push button is activated to indicate the cistern is flushing and when the cistern is filling, a light on the flush button flashes softly. And in the case of a power supply failure, the Meridian In-Tank has a 9 litre capacity to allow for up to 4 full flushes during this time.

Soft Air® Technology

Developed in conjunction with Fluidmaster for Roca, Soft Air® Technology is a special process which comprises an air injection system in the cistern to optimise water flow. This clever feature ensures an effective flush while still being water efficient.

Roca Tapware

Highly functional and superbly styled, Roca brings more than 60 years of engineering excellence to the design of its mixer collection. An early pioneer of sustainable design, each Roca mixer utilises innovative technology to maximise water efficiency.

A beautiful EverShine® finish

The brilliant, hard-wearing chrome finish of all Roca mixers is made possible through its innovative EverShine® technology. This advanced electrolytic coating is significantly thicker than many brands. Roca even subjects its finishes to a rigorous 200 hour salt spray test – up to 4 times longer than other products on the market – so they will continue to sparkle for many years.

Precise control with SoftTurn®

The advanced Roca SoftTurn® cartridge found in every mixer, sets it apart from other manufacturers. Roca mixers are subjected to 3 times the cycle testing of other cartridges as well as pressure tested at 2½ times what is required by Australian Standards. SoftTurn® delivers precise control of flow and temperature over the life of the product.

Escuadra

Inspired by the natural world, the Escuadra series draws its bold identity from the formation of spectacular rock outcrops smoothed with the passage of time. The perfect combination of cutting edge technology and innovative design, Escuadra is a visual masterpiece for the bathroom.

Roca Design Centre

The Escuadra range was created at the Roca Design Centre – a range that draws its identity from the formation of spectacular rock outcrops.

L20

Roca's latest addition to its wide range of eco-friendly taps is the L20 collection. Easy and intuitive to use, the L20 collection features an innovative Cold Start Technology system, so the flow of water always starts with cold. This ensures hot water is only activated when necessary. And with its superb looks, the L20 allows you to save energy without compromising on style.

Roca Design Centre

The L20 range was created at the Roca Design Centre – an eco-friendly and intuitive collection.
