The world is becoming smarter

It's a fact. Mobile phones that connect us to our life from anywhere, watches that care for our health, environmentally friendly cars, and sustainable cities. More and more elements around us are incorporating technology to improve our quality of life. Because technology only makes real sense when it's designed for people. And when that happens, it becomes an essential part of our lives.

Welcome to the smart world.

Join the smart flow

It's time to take a step further. Bring the latest technology to your toilet, turning it into the place where comfort and hygiene come together to provide a unique experience. Rediscover the feeling of cleaning yourself with water. There is nothing as intelligent and natural.

The future of toilets is here. And it's smart.

Welcome, Smart Toilet

Being smart is owning the latest technology without giving up on the aesthetic, functional and safe commitment of traditional solutions.

Being smart is using such simple and intuitive interfaces that anyone can perfectly understand them from the first try.

Being smart is offering the chance to customize settings in order to meet everybody's preferences in an easy manner.

Being smart is having a universal design that adapts to the needs of everyone and integrates effortlessly into any space whatever its style.

In-Wash® Inspira. **The Smart Toilet.**

Smart choice

For everyone

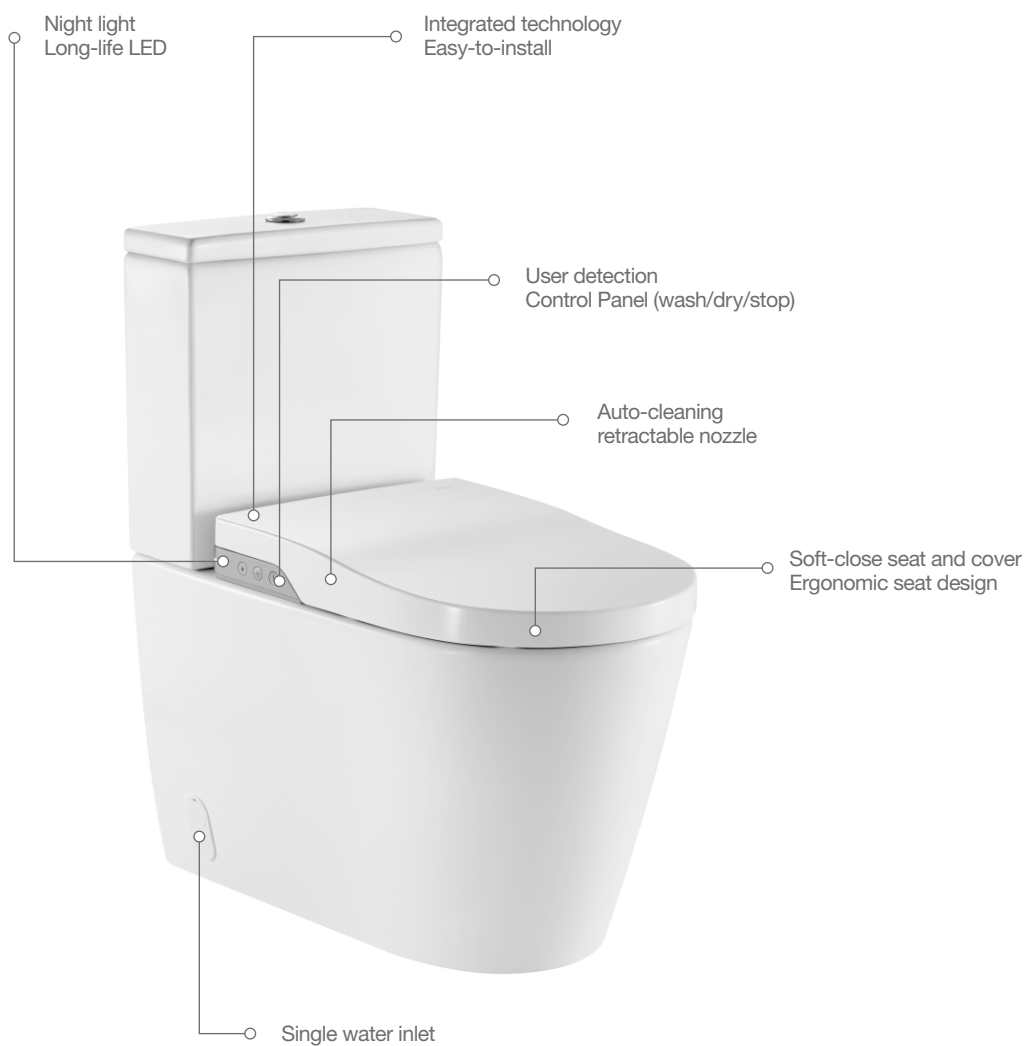

Its soft curves, its minimalist design and its intuitive technology make it a toilet that fits any lifestyle. In Roca, we believe that technology should not be exclusive, but accessible to all and totally versatile to suit everyone's needs.

By the smartest

In-Wash® Inspira has been developed by Roca's designers and engineers, experts on bathroom solutions, that have incorporated the most advanced technology to respond to the needs of the most demanding consumers.

Smart efficiency

Smart, efficient and reliable

A night light that guides you to the toilet, adjustable water and air temperature, easy installation, and user-detection technology. Every single detail of In-Wash® Inspira is designed with a clear purpose: to bring home the most advanced, practical and pleasant toilet ever created.

Features

Integrated control panel

The side panel allows control of the basic cleaning and drying functions with complete ease.

User detection

In-Wash® Inspira includes an infrared sensor that prevents its activation if it does not detect any presence on the seat.

The sensor detection starts a preheating process which is performed at 36 degrees. This ensures water is released at the correct temperature.

Comfort seat

The In-Wash® Inspira offers a wide and comfortable seating area.

Soft-close

Seat and cover with soft-close hinges.

Removable nozzle tip

The nozzle tip is removable for easier cleaning.

Self-cleaning nozzle

In-Wash® Inspira has a retractable nozzle with a self-cleaning system that turns on before and after each use.

LED light

The LEDs of the In-Wash® Inspira can be adjusted to guide you to the toilet without needing to turn on the light of your bathroom. There are 4 modes for the In-Wash® light settings:

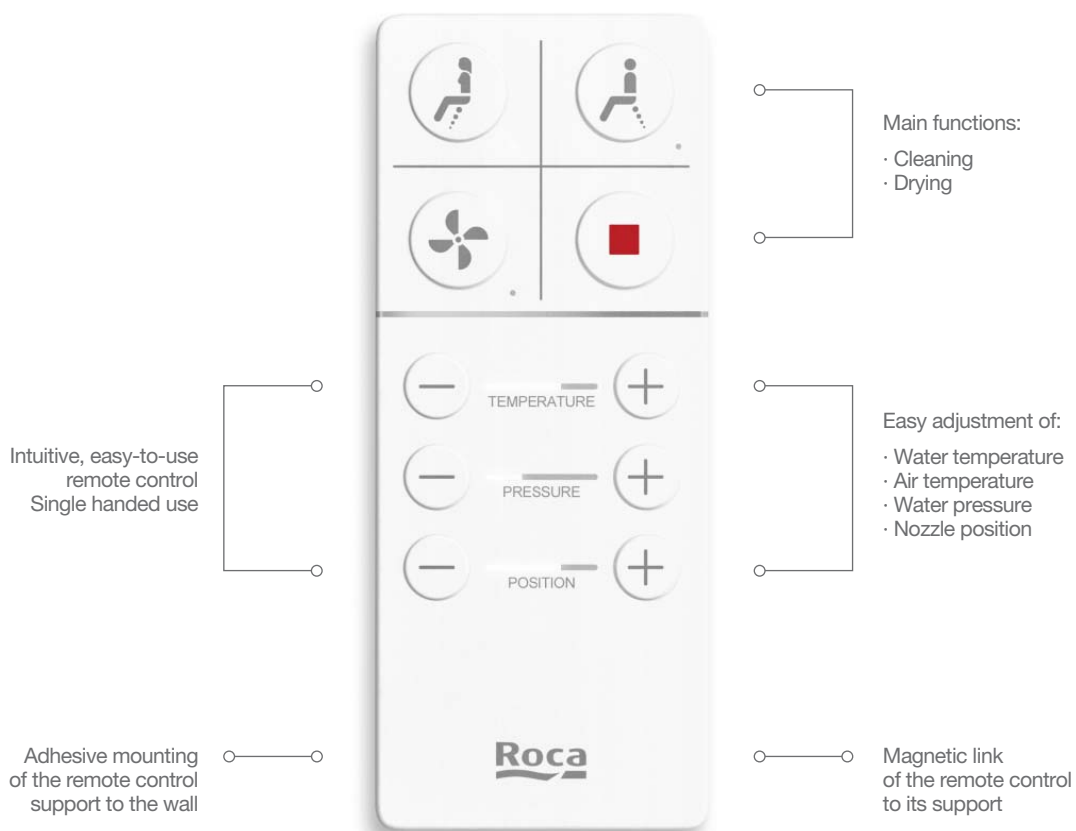

Standard: The lights will stay off while In-Wash® is not in use. The lights will switch on when the lid is opened and they will switch off one minute after the user is no longer detected.

Night Light: In-Wash® lights will turn on daily for 8 hours and stay off for the remaining 16 hours.

Standard with night light: In-Wash® lights will stay on daily for 8 hours and work as in the standard mode for the remaining 16 hours.

Off: In-Wash® lights will stay always off.

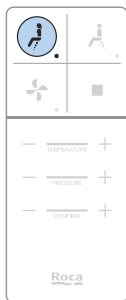

Smart simplicity

When less is more

In-Wash® Inspira is the perfect solution for your daily hygiene. Uncomplicated and straightforward. Its remote control is absolutely intuitive and anyone can easily customize its settings through simple interfaces.

Functions

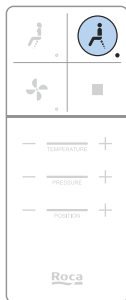

Front wash
(perineal)

The nozzle front position is activated.

Adjustable settings:

- Water temperature
- Water flow pressure
- Nozzle position
- Nozzle oscillating movement

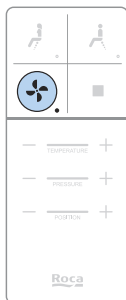

Rear wash
(anal)

The nozzle rear position is activated.

Adjustable settings:

- Water temperature
- Water flow pressure
- Nozzle position
- Nozzle oscillating movement

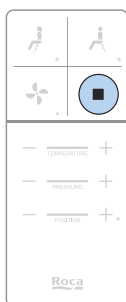

Drying

The drying function is activated.

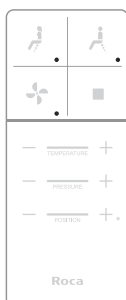

Adjustable settings:

- Air temperature

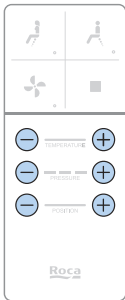

Stop

Stops the current activated function.

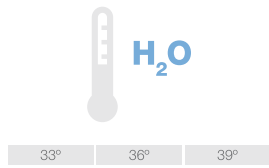

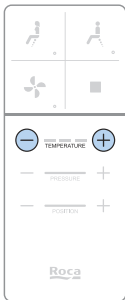

Low battery
warning

When the battery is running low, all LEDs in the remote control blink at the same time after use.

Adjustment and control

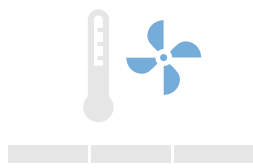

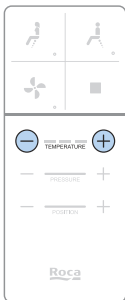

All settings can be precisely adjusted thanks to the intuitive symbols of the remote control interface.

Adjustable water temperature

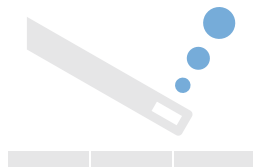

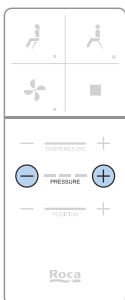

The water temperature presents three different settings:

- Low 33° - 1 LED on
- Medium 36° - 2 LEDs on
- High 39° - 3 LEDs on

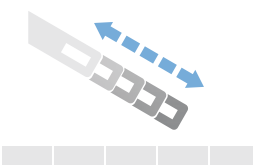

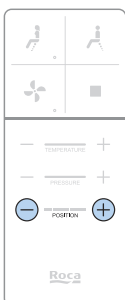

Adjustable drying temperature

The air in the drying function has three temperature levels.

Adjustable water pressure

The water flow has three intensity levels.

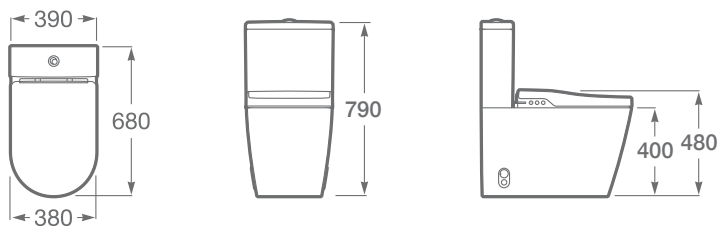

Adjustable nozzle position

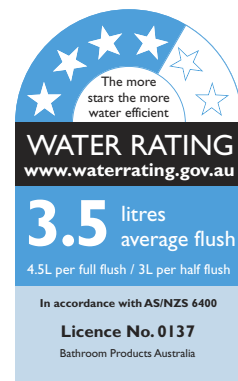

The nozzle has five different positions for an accurate adjustment to each user.

Versions

In-Wash[®] Inspira

Close Coupled Back to Wall
Toilet Suite

Easy to install

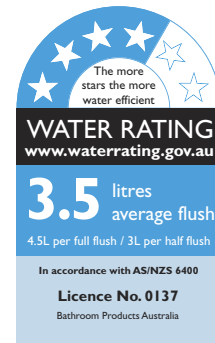

Single water inlet

In-Wash® Inspira only requires one water inlet which later distributes it to the cistern or to the nozzle after filtering it.

Certification:

WMKA02321
WELS 4.5/3 4*

Easy-to-install remote control support

The support for the remote control can be mounted to the wall with adhesive or screws.
